REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The amendment filed on 2/14/2005 has been carefully considered. Applicant's argument is persuasive. Neither Terashima 6,274,947 nor Ito et al. 5,650,698 teaches or suggests the method steps of:

- a) after start-up of the motor, establishing a number S1 representing a normal speed;
- b) measuring operating speed S2 of the motor; and
- c) if (S1 minus S2) is a positive number exceeding a predetermined limit, then either shutting down or reversing the motor.

Furthermore, none of the references measures "a positive number exceeding a predetermined limit" as required in the claims.

Claims 38-46 are written in "means plus function" under 35 U.S.C. 112, sixth paragraph. The claims have been carefully interpreted in view of the specification. The references of the record fail to teach or suggest the means for setting a baseline reference each time the motor starts under first conditions and second conditions, and means for determining as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
